3. As long as it is Thanos's turn, rolling the dice will determine the action taken by Thanos.
4. If the player starts first, the player will be allowed to put down/use a total of ONE attack card which can come from ANY character before rolling the dice.
5. As long as the player has a matching infinity stone card with the one in possession, the player can use it a maximum of ONCE for any turn. Once used, both the infinity stone powercard and the infinity stone card have to be put face up beside the power-up cards face-up.

Goal of the game

You as the player will need to defeat Thanos without any casualties by making use of the unique character abilities, wildcards and infinity stone cards but are chance based. Each character will be started off with 4 standard attack cards and 2 unique character ability cards at the start of the game. The game progresses in the way that the player will have roll the dice at the very start of the game to determine who shall land the first attack on who.
